## Etisalat Academy

We are the largest single-source training solutions provider in the Middle East. We have a passion for providing industry-specific skill solutions that give real results to both businesses and individuals.

We offer specialist skills training in ICT, as well as training and consultancy services in finance and accounting, business, soft skills, telecommunications, assessment, HR and personal development.

Whether delivered on our 1.2 million square foot campus in any of our 50 training rooms, or on-site in your organisation, our ICT training options will significantly boost on-the-job performance.

Our training programs are backed by 30 years of experience providing training, consultancy and human capital development services to companies across all industries and business sectors, including telecoms, government, oil and gas, and finance. Our partner network spans five continents, delivering world class training solutions to customers in countries such as Afghanistan, Bahrain, Egypt, India, Iran, Iraq, Kuwait, Libya, Nigeria, Oman, Pakistan, Qatar, Saudi Arabia and Sudan.

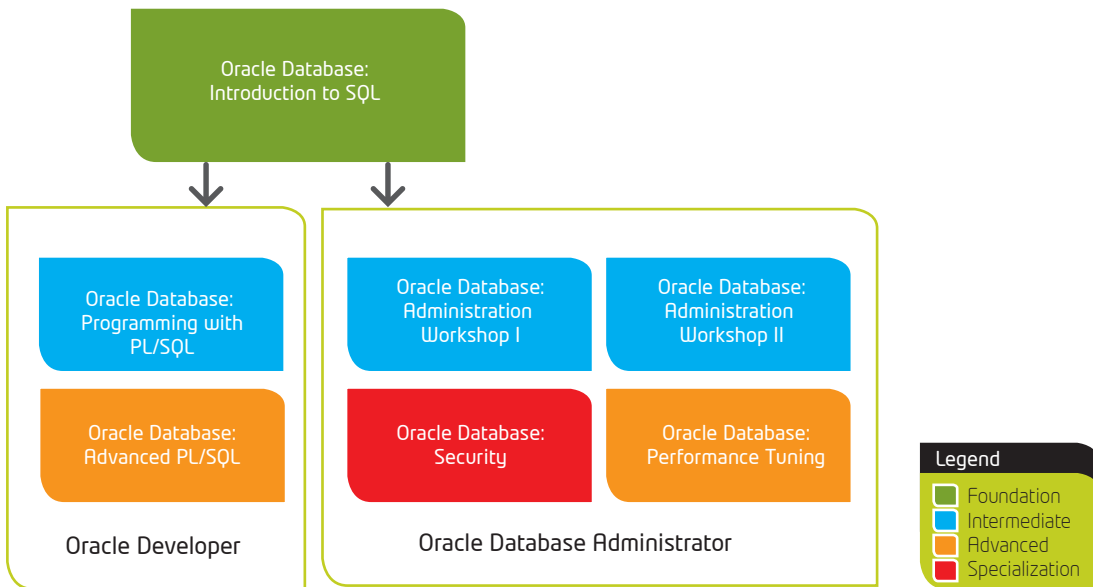

We ensure the highest quality through our world standard quality management systems, and have achieved the ISO 9001:2001 certification.

Read on and find out how we can make a difference to you...

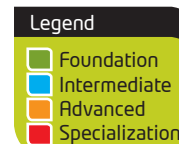

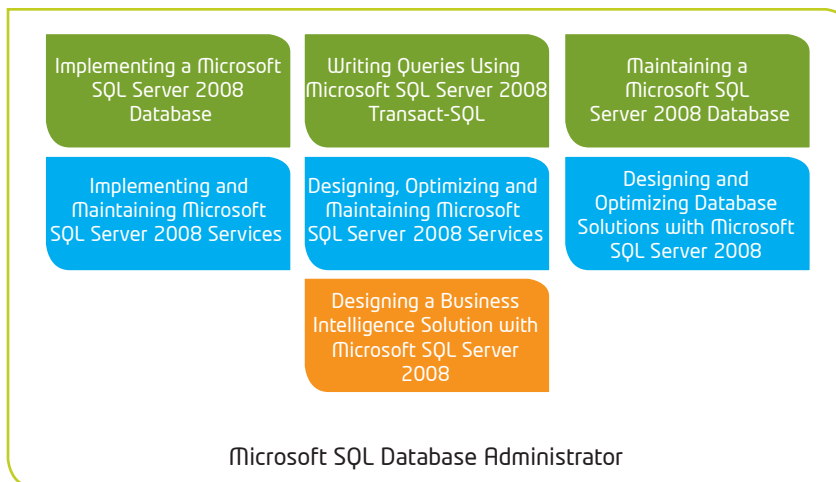

## Oracle

From managing a single database instance to administering a high-performance cluster that executes billions of transactions, our Oracle track can help you to prepare for the challenges of deploying, managing and developing for Oracle environments. Offering the full range of Oracle topics, our programs aim to develop the practical skills and the mind-set that our trainers - highly successful Oracle administrators and developers - have come to share. At Etisalat Academy we will help you at each step of the way to reach your career goals.

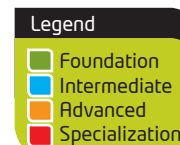

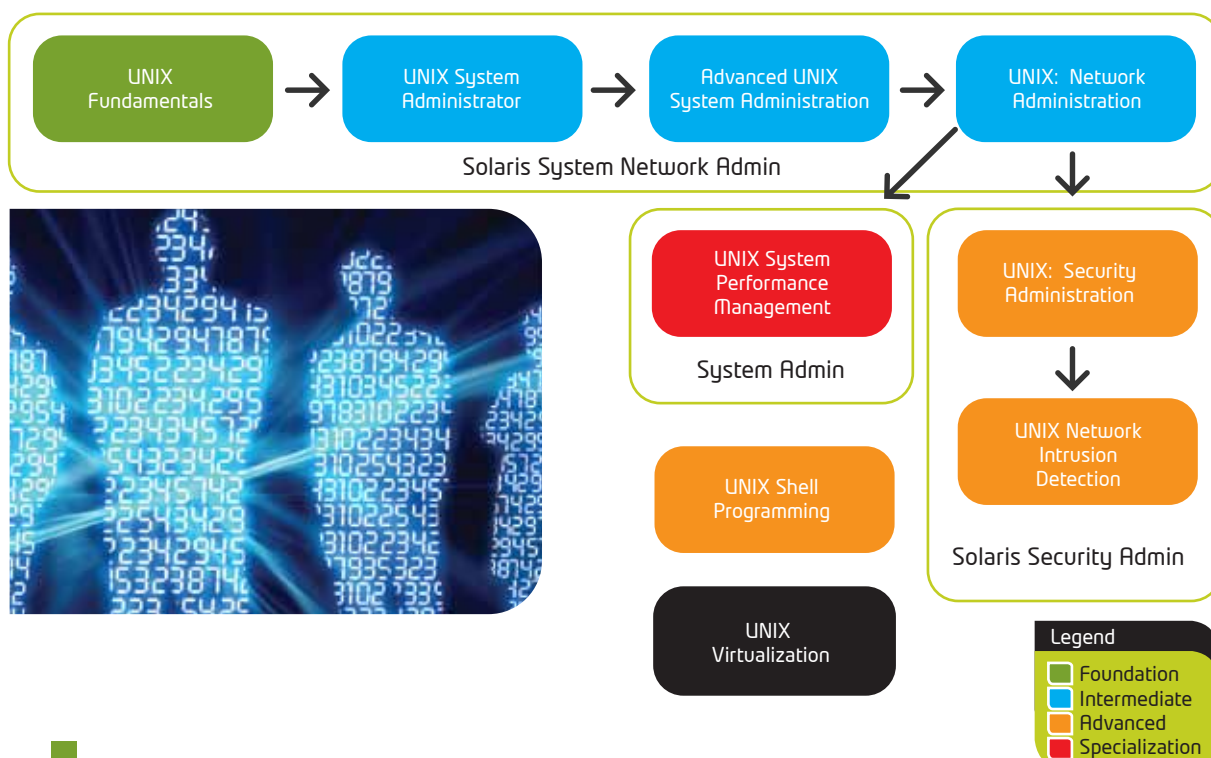

## Microsoft SQL

Our Microsoft SQL track offers something for everyone – from the SQL beginner to the experienced IT engineer. We help to build the practical skill set that will take you through some of the biggest challenges of your database administration career. Nothing beats attending a formal training program, where you can experience a different perspective, learn from mistakes (the ones you can't afford to do in a production environment), and learn techniques and best practices that you can import directly into your daily work.

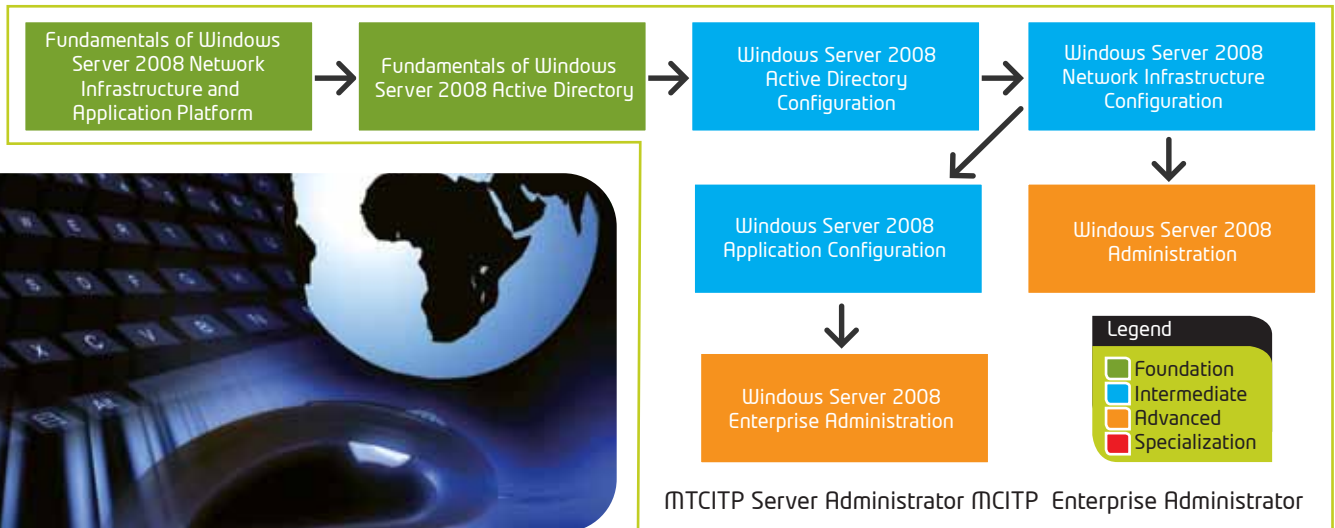

## UNIX System Admin

Learn UNIX from the people who have used it since the beginning – telecom operators were the first adopters of UNIX, and rightly so – 24/7 operations demand the best operating environment for hosting critical applications. Our comprehensive, skills oriented and deeply technical UNIX track features Sun Solaris. If you're using Linux and HP-UX, we offer these too.

## Windows System Administrator

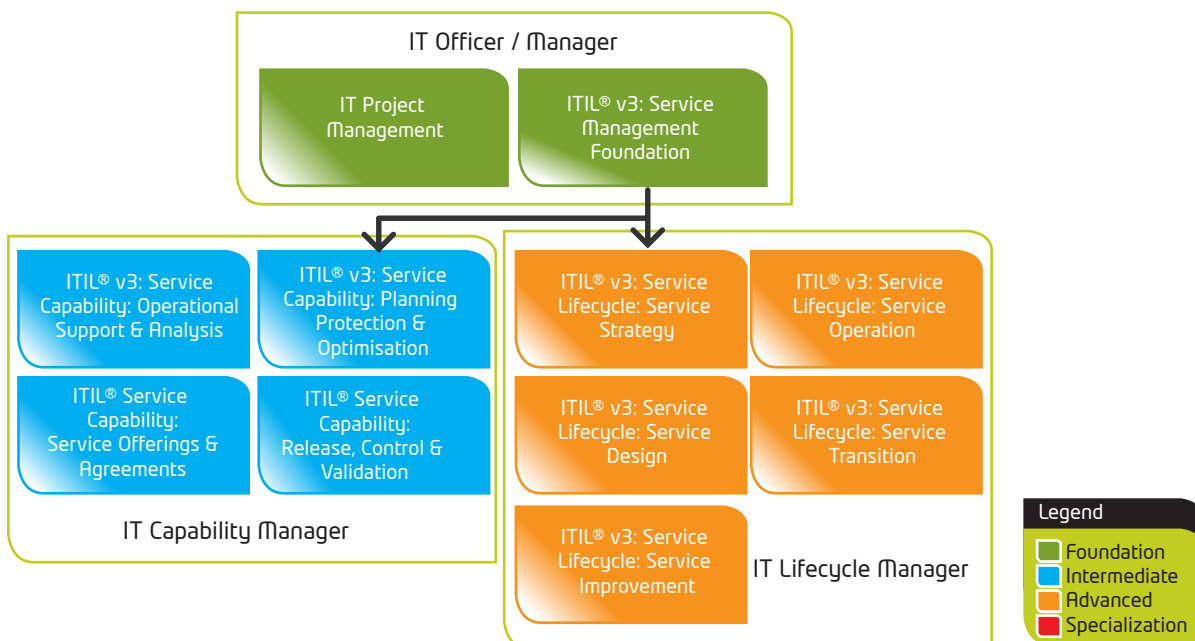

In this day and age, anyone who knows how to click the "Next" button, or to right-click and select "Properties" calls himself "a Windows System Admin". But few have what it takes to deploy, configure and administer Windows-based operating environments in a manner that enables truly secure, reliable and fast business transactions. Ask the average IT manager- they will know what we mean. So, with this in mind, we bring you a series of skills-based, technical and high-impact Windows Server training programs.

Windows System Admin

## IT Management

The increased demand for IT departments to be aligned with organisations' business goals and to increase corporate efficiency has triggered the Information Technology Infrastructure Library (ITIL®). ITIL equips students with the skills necessary for consistency and for preparing documentation in line with best practices. Furthermore, ITIL Certification for IT professionals has become mandatory in many public and private sector organisations. Professionals with a high degree of IT project management skills and ITIL certification will be an invaluable tool for any organisation that has global reach or is moving towards a global strategy. Whether you are new to ITIL or upgrading your skills, Etisalat Academy ITIL training ensures that you will be prepared and confident for your exams, and ready for a great career.

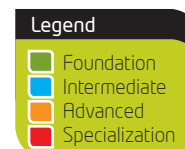

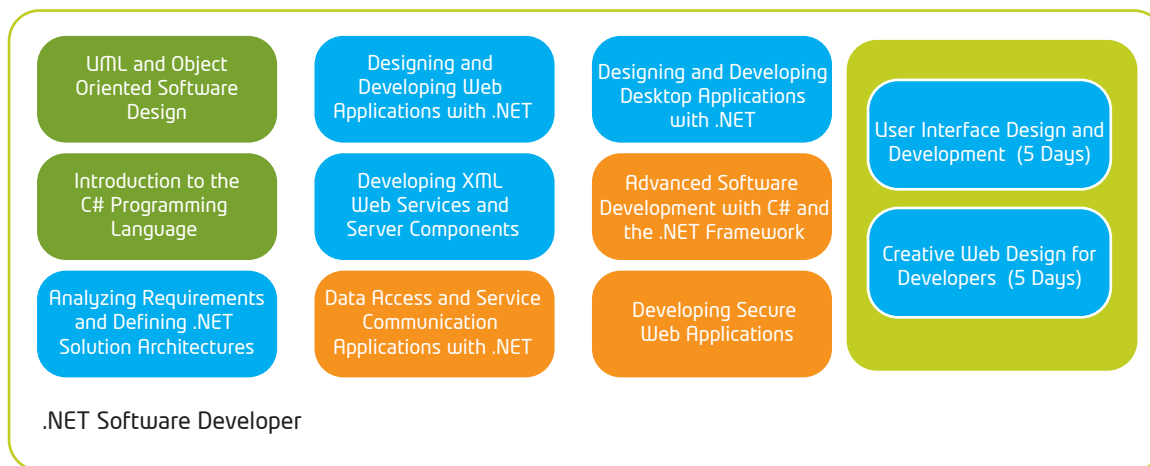

IT Management

## Software Development

Etisalat Academy helps you prepare for a challenging but rewarding career as a software developer. Our training programs don't just prepare you to be a developer, but act as your stepping stone to the next level – QA engineer, software and solutions architect and information systems analyst, are all within your reach. And if C# is not your platform of choice, we can offer a comprehensive range of Java and C++ training programs as well!

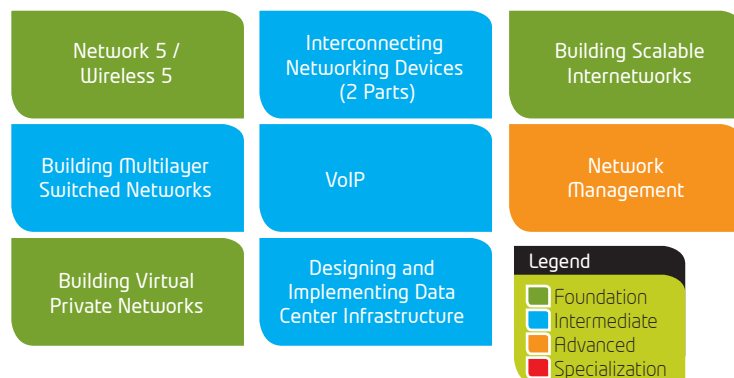

Software Development

## Networking

Today's managers, developers, IT staff and help desk personnel need more than just the basics in networking technology and data communication systems. IT professionals must seek to broaden and update their networking knowledge.

Networking

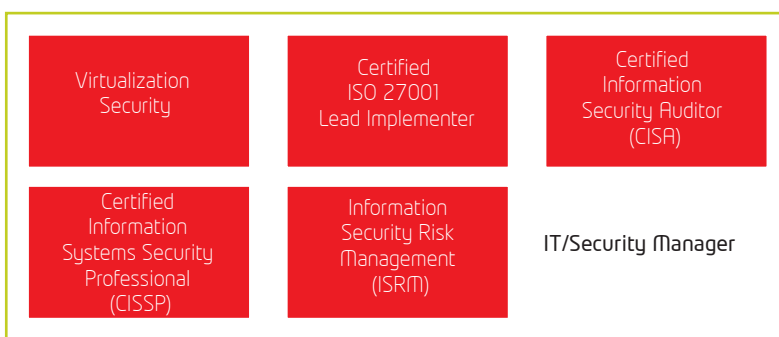

This track will give you a solid foundation in networking concepts and practices to streamline enterprise operations and maintain a competitive edge and a working knowledge of IP addressing, TCP/IP operation, LAN solutions, Quality of Service (QoS) requirements, wireless network options, security elements, enterprise internetworking and modern hardware.

## Information Security

Security careers have been on the rise with expanding social network threats, major data breach news, dangers in mobile computing, insecurity of web applications and commerce platforms and a broad spectrum of IT management concerns from compliance issues to threat detection competencies. Security is a technology and IT management is more essential in today's world. IT security is a career option that no IT worker can afford to miss in today's market. These courses are the basic steps towards becoming a Network Security Administrator or IT Security Manager.

## A compendium of best practices builds a framework for credibility

The CISSP examination tests the breadth and depth of a candidate's qualifications by focusing on the ten information security domains of the CBK, (ISC)<sup>2</sup>'s compendium of industry best practices:

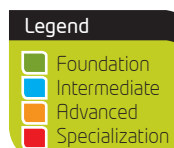

- Access Control Systems and Methodology
- Applications and Systems Development Security
- Business Continuity Planning (BCP) and Disaster Recovery Planning (DRP)
- Cryptography
- Law, Investigation and Ethics
- Operations Security
- Physical Security
- Security Architecture and Models
- Security Management Practices
- Telecommunications and Network Security

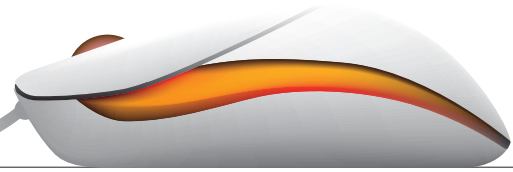

## Training that makes a competitive edge even sharper

The organisation responsible for creating and updating the compendium of best practices is also the ideal resource when preparing for the certification and concentration exams. (ISC)<sup>2</sup> helps you hone your expertise with seminars that include:

- Exam preparation through comprehensive reviews of all domains of the CBK
- Survey of the spectrum of understanding required in the field
- Practice exams that provide real world examples of the rigour of the (ISC)<sup>2</sup> examination experience
