

5 Day NCEMA Lead Implementer (NCEMA 7000:2015) Workshop

Duration: 5 Days

Language: English

Course Delivery: Classroom

Course Description

NCEMA has produced NCEMA 7000:2015 a Business Continuity Management Standard to build an organization's capability to continue functioning and delivering its prioritized activities when its operations are disrupted due to emergencies or crises. Our 5-day NCEMA Lead Implementer Workshop provides an intensive and comprehensive learning experience for those wishing to understand in great depth the fine details of the NCEMA 7000:2015. Training methodologies include power-point-based classroom lectures, group discussions, and individual/group exercises based on a case study, and videos. Participants who pass the exam to be held at the end of the workshop will be able to call themselves NCEMA 7000 Lead Implementer, having covered in the course the clauses of the NCEMA 7000 and also the hands-on exercises of implementing BCM in line with the NCEMA 7000. Our Trainers for this workshop typically possess 2-3 certifications in BCM and have 5-10 years hands-on experience in Business Continuity and Emergency Response.

Prerequisites

There are no formal prerequisites for this course, but it is recommended that the participants have some knowledge and experience in the BCM domain.

Audience

- Project managers or consultants wanting to prepare and to support an organization in the implementation of a Business Continuity Management System (BCMS)
- Business continuity auditors who wish to fully understand the implementation of BCMS
- Persons responsible for the business continuity conformity in an organization
- Members of business continuity team
- Members of an organization who want to prepare for a business continuity function or for a BCMS project management function

Learning Objectives:

- Understanding NCEMA 7000:2015
- Understand the importance of an NCEMA 7000 compliant Business Continuity Management System (BCMS)
- Gain a comprehensive understanding of the concepts, approaches, standards, methods and techniques required for the effective management of a BCMS
- Understand the relationship between the components of a BCMS and the compliance with the requirements of different stakeholders of the organization
- Acquire the necessary expertise to support an organization in implementing, managing and maintaining a BCMS as specified in NCEMA 7000
